

# CREATE A GUITAR!

PAGE 1

Everyone loves music, and the guitar is one of the most popular instruments around. Guitars have been in use in Europe since the 12th century, but they actually originated long before then in central Asia and India. There is even a 3,300 year old stone carving showing someone playing an instrument much like a guitar!

This guitar is brand new, courtesy of the LEGO Master Model Builders - and you can build it using pieces from your LEGO collection! ■
