

BUILD A TIGER!

PAGE 1

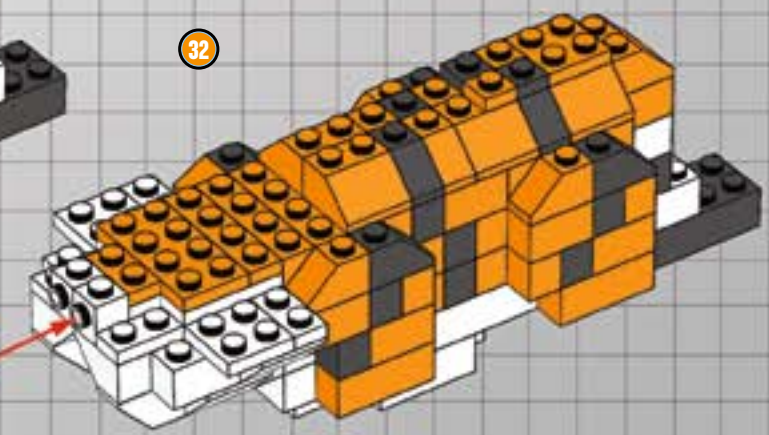

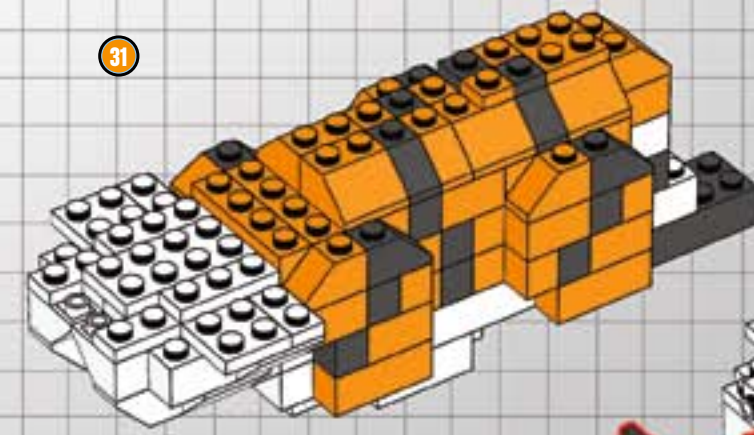

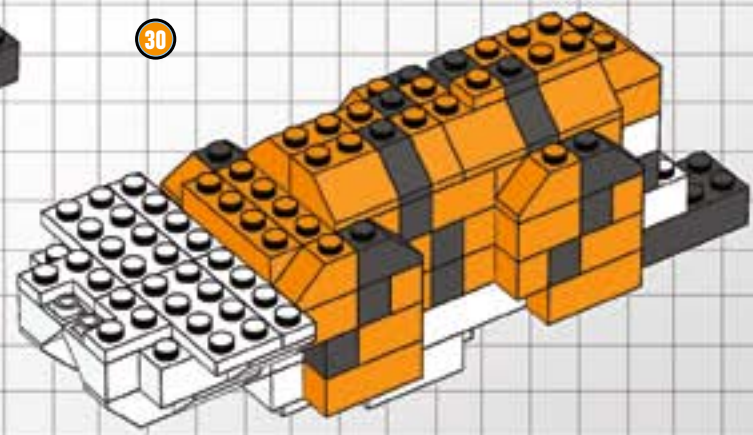

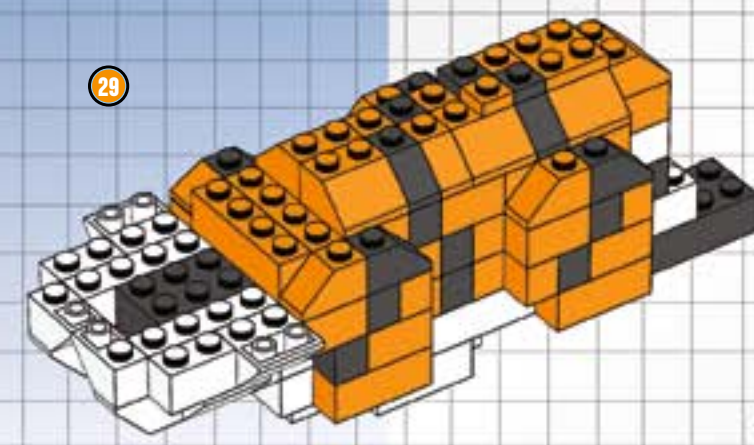

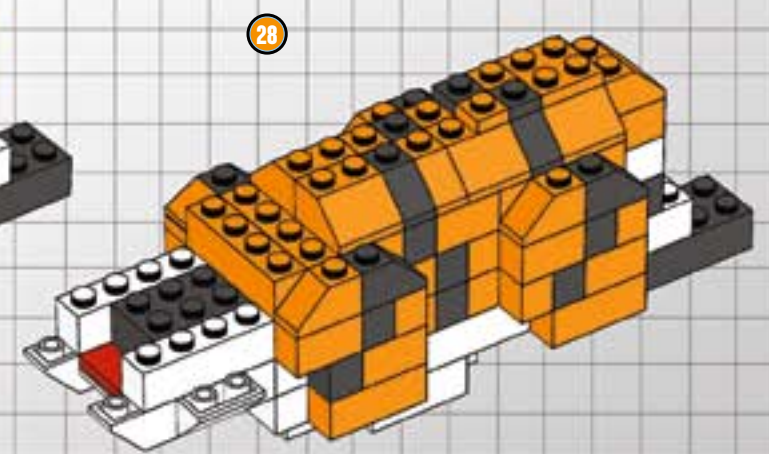

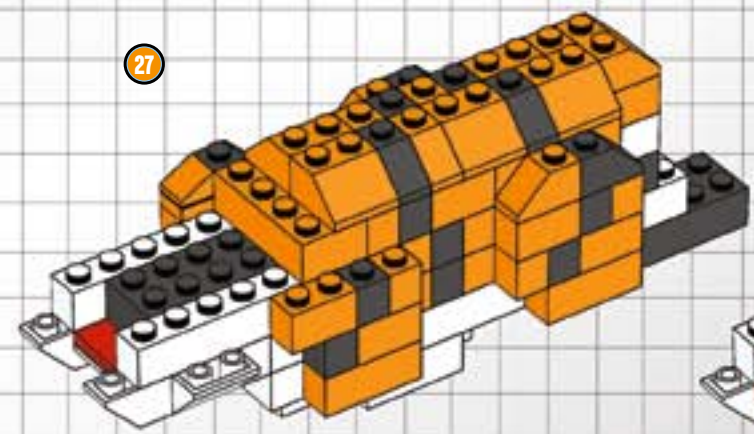

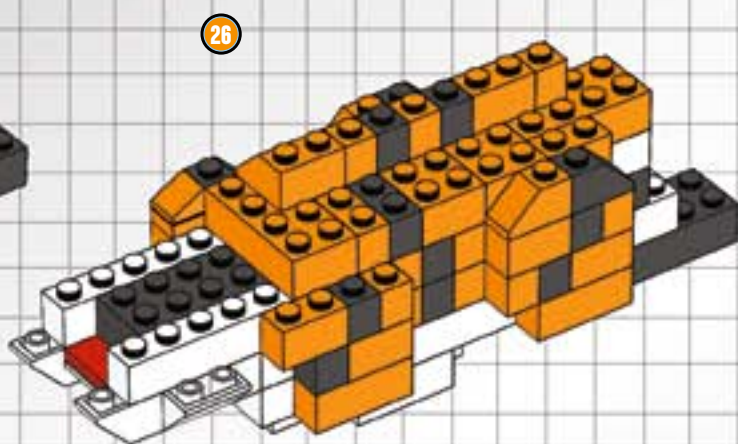

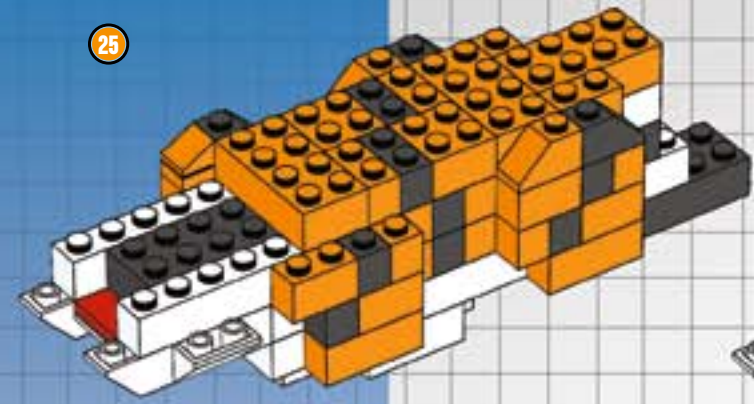

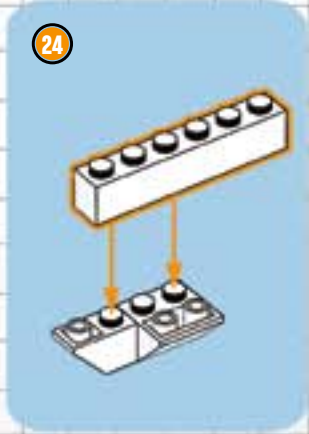

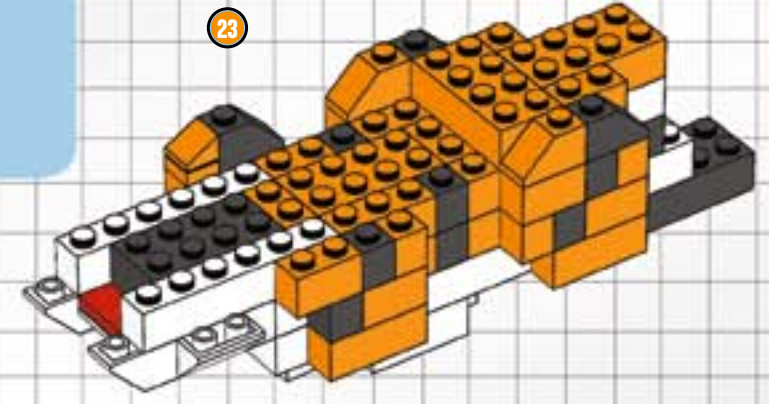

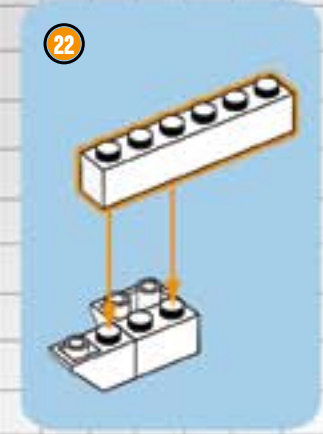

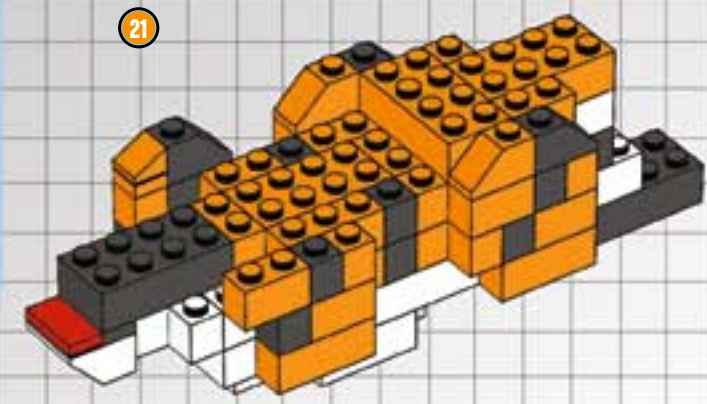

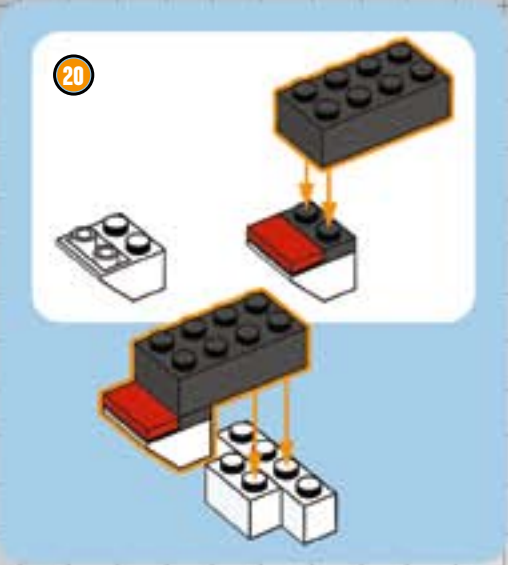

Tigers are some of the most beautiful animals in the world. Native to eastern and southern Asia, a tiger can reach up to 11 feet in length and weigh up to 600 pounds. An endangered species, tigers are threatened by habitat destruction and hunting. There are now only about 2000 left in the wild, but it is hoped that conservation efforts in India and Russia will help those numbers increase.

You can build this tiger using pieces from your LEGO collection. ■
