

OGRE WAGON!

BUILDING STEPS

Are you tired of tying up ogres and dragging them to your colony? Fed up with injuring your men in the process? Then this is the vehicle for you. The Ogre Transport 10,000 B.C. It comes with six hand crafted stone tires. Able to support up to 20,000 lbs. Easy slid ramp in the rear, durable enough for the larges ogres. It's roomy enough to carry at least 6 trolls. It even has a covering to block out the sun on the hottest of days. With a design reminiscent of an elephant it has the capacity to chain at least 6 imperialist caste dogs to the front (or four men and one dwarf). Smooth swivel front and easy access feeding ports, this is the one vehicle you can't live without.
