

Build the Caravan Crawler using pieces from #8892 Piraka Outpost and #8893 Lava Chamber Gate.

This assembly guide shows the construction of the Caravan Crawler in 40 numbered steps. The steps are arranged in a grid-like fashion, showing the progression from a flat base to a fully assembled, multi-legged creature. The main body is constructed from blue Technic bricks, forming a central structure with two large arches. The legs are made from grey Technic beams and connectors, with some featuring orange and yellow flame-like details. Step 40 shows the final assembly, which is a complex, multi-legged creature with a central body and two large, curved blades on its sides. A yellow box labeled 'FINAL' is placed next to the completed model. A small inset image shows a close-up of a specific assembly point. The background is a white grid, and the overall theme is dark and industrial, consistent with the Bionicle Piraka series.
